Michael,

I am flying out of Kenai at 8 am. I get into Seattle just before 4 pm. So unless James wants to work into the evening I don't see how Monday could work. I will already be gone all week and have been stuck in Juneau today (no flights out of Seattle to carry on to Anchorage, note the time of this message as I sit in the Juneau airport). I'd like to spend the weekend at home if at all possible. James has all the information, I have asked him several times since mid December for this analysis and mapping work but have not been able to get what I need. That is why I was hoping to sit and work directly with him. That approach worked well with Becky, but she is not available. I have Tuesday all day or Friday afternoon.

I suppose if I have to I could fly on Sunday.

Phil

Can you see if later on Monday would work? See below. Best to find a time with James and make it work.

Thanks

Hi Michael,

Rick Perkins spoke with me about arranging a meeting for Phil North with James during the week Phil will be in Seattle. James will be gone that week to a workshop on Tuesday and Wednesday. I spoke with James about this who, as far as I know, is attempting to get in touch with Phil for a meeting possibly on Monday of that week. James has been already providing support to Bristol Bay project, became familiar with the project in great details, and I'd like him to continue this. Unless James and Phil cannot workout a time to meet with each other and this is a very time critical/high priority program needs, I would not want to assign to another staff who is unfamiliar with the project. Please ask Phil to provide James necessary data prior to his trip in the regional office, that way James can begin making progress for his request.

Thanks,  
Mahbubul

Scott and Tim,

Phil is flying down from AK for the Bristol Bay meeting. He was hoping to work with James on Monday/Tuesday, but it sounds like he will be in a conference. Can either of you help Phil with this important digitizing work. Best to coordinate directly with him.

Thanks again for your help on the interviews.

Thanks
